

Advanced Architectural Products is

# NET ZERO & CARBON NEUTRAL

## Building a Sustainable Future

Buildings and their construction account for nearly 40% of carbon emissions today. As a building materials manufacturer, it is our goal to help eliminate global warming, and the impact buildings have on our environment.

Advanced Architectural Products (A2P), makers of GreenGirt composite metal hybrid (CMH) z-girts and SMARTci continuous insulation systems, is an engineering company that provides innovative, best practice building envelope solutions. A2P has adopted a net zero and carbon neutral manufacturing model for all of their products and systems with the goal of creating healthy and energy efficient buildings.

Advanced Architectural Products is committed to creating a better tomorrow and protecting our environment by reducing energy consumption and greenhouse gas emissions.

### Our Vision:

To be the most compelling building material manufacturer by leading the world's transition to sustainable and healthy structures in our space.

### Our Mission:

Create the best continuous insulation while leaving the world a better place than when we started.

- ✓ **Solar Energy** (HQ 100% solar powered)
- ✓ **Geological Carbon Sequestration**
- ✓ **Grassland Carbon Sequestration**
